

What is School Messenger?

School Messenger is a mass communication service that the District will use to notify parents and staff of school emergencies. Additionally, announcements regarding school closings and general information (fundraisers, concert, weather and event reminders, etc.) would be available if chosen as an option.

Who can participate in the School Messenger Service?

The school messenger service will be available to all District parents/guardians and District staff.

School Emergency Notification

All District parents/guardians/staff will automatically be enrolled in the School Messenger emergency message system. Automatic enrollment in the system means that the message service will call all phone numbers that are on file with the district should there be a school emergency.
